Conclusions & Business Recommendations

Strong YoY Growth	Revenue grew by -8.0% from 2023 to 2024, indicating healthy business expansion. This growth was driven primarily by Electronics category and high-value products like Laptop Pro X1.
Regional Imbalance	East region dominates revenue but West and South territories show lower contribution. Targeted sales campaigns in underperforming regions could significantly boost overall revenue.
Electronics Dependency	At 76.9% of total revenue, the business is heavily reliant on Electronics. Diversifying revenue through Furniture and Stationery can reduce concentration risk.
Healthy Profit Margins	A profit margin of 42.4% is strong for a retail operation. Maintaining cost discipline while scaling volume is key to sustaining this.
Discount Strategy	Average discount rate of 6.9% is moderate. Analysing discount impact by region and product can help optimise pricing strategy without eroding margins.
Top Performer Leverage	Divya Menon leads the team — their sales approach and customer handling techniques should be documented and replicated across the team.
